

COBRA and State Continuation

All Trailblazers Leave a Path

Trailblazer (*noun*): one who makes, does, or discovers something new and makes it acceptable or popular; one who marks or prepares a trail for others to follow.

Since 2002, DataPath's COBRA solution has been blazing a trail in the healthcare benefits administrative industry. Our best-in-class system has been chosen by many of the largest COBRA administrators in the country who abandoned their prior systems in favor of ours.

As a TPA, you're trying to remain competitive, stay on top of regulatory changes, and attract and maintain revenue streams. Overcome these challenges and create a route to greater success for you and your clients with DataPath COBRA. Enjoy seamless functionality, schedule-based notice generation, comprehensive account reconciliation capability, automatically monitored COBRA-related events, timeframe tracking, and legal compliance reports.

Our Premium Billing solution also provides full-featured State Continuation administration with easy setup wizards, flexible importing, integrated cash management, and state-of-the-art fulfillment services.

DataPath Billing Solutions address important concerns such as these:

“Billing plan setup can be complex, and enrollment takes a lot of time.”

DataPath has simplified the billing plan creation process by providing users with setup wizards and the ability to easily import census, benefit, qualifying event, and payment data. Employee and group census data may also be imported from other DataPath solutions.

“Each of my employer clients has specific needs. Additionally, I have to keep track of numerous HR changes.”

With DataPath Premium Billing, you can create custom controls for the needs of each employer. You can also receive notice of new hires, dependents, address changes, coverages, and qualifying events through our online portal.

“I have to be able to bill to and record payments from third parties.”

Our simple, straightforward “third-party payer” feature allows an entity other than the named policyholder to be invoiced for premiums. Specify the third-party billing entity during account setup, or create as needed per benefit being billed. Receipts can be identified in the system by the actual payer, allowing any subsequent refunds to be made to the payer rather than the policyholder.

Intuitive interface

- Perform status changes from one screen
- Utilize easy undo function to reverse rate changes, qualifying events, elections and terminations
- Simplify batch processing of letters and reports

State-of-the-art fulfillment services

- Generate documents and notices automatically per event timeline
- Store documents digitally and on the web
- Print original documents on demand
- Receive proof of mailing

Accessible web portal

- Access your account 24/7
- Make online elections
- Communicate, report, and interface with employers and employees

Other benefits

- Automate compliance
- Choose from multiple delivery options, including web posting with email notification
- Submit CSV or Excel file formats
