

Direct and Customized Billing

All Trailblazers Leave a Path

Trailblazer (*noun*): one who makes, does, or discovers something new and makes it acceptable or popular; one who marks or prepares a trail for others to follow.

DataPath's Direct and Customized Billing Solutions are making leaps and bounds in the healthcare benefits administration industry, helping DataPath become a market leader in billing solution functionality.

As a TPA, you're trying to remain competitive, stay on top of regulatory changes, and attract and maintain revenue streams. Overcome these challenges and blaze a trail to greater success for you and your clients with DataPath's Direct and Customized Billing, which can be applied to various billing arenas and adapted to a variety of specifications to meet your needs.

DataPath's Direct Billing solution is used not only for collecting premiums for group health benefits, but can also be applied to other billing arenas such as leave of absence, contract employees, individual marketplace payments, parking fees, and union dues, or other purposes tailored to your needs. Our versatile solution adapts to a variety of specifications, enabling you to handle any payment, benefit, billing, and election structure. Additional features include unlimited plan designs, flexible importing, integrated cash management, and fulfillment services.

DataPath Billing Solutions address important concerns such as these:

“Billing plan setup can be complex, and enrollment takes a lot of time.”

DataPath has simplified the billing plan creation process by providing users with setup wizards and the ability to easily import census, benefit, qualifying event, and payment data. Employee and group census data may also be imported from other DataPath solutions.

“My clients have unique billing needs, which require specific plans and tier structures for each one.”

Our Premium Billing solutions allow you to create unlimited plan designs and tier structures, with customizable eligibility, payment grace, and election periods. There are also unlimited options for subsidy and severance packages, and our solutions also accommodate all loss of coverage rules.

“Cash management is overwhelming with so many incoming and outgoing payments.”

DataPath's integrated cash management enables you to track all payments, create checks, and issue refunds.

“I have to be able to bill to and record payments from third parties.”

Our straightforward “third-party payer” feature allows you to accurately invoice an entity other than the account holder. Specify the billing entity during account setup, or create as needed per item or benefit being billed. Receipts can be identified in the system by payer, allowing any subsequent refunds to be made to the correct party.

Intuitive interface

- Perform status changes from one screen
- Utilize easy undo function to reverse rate changes, qualifying events, elections and terminations
- Simplify batch processing of letters and reports

State-of-the-art fulfillment services

- Generate documents and notices automatically per event timeline
- Store documents digitally and on the web
- Print original documents on demand
- Receive proof of mailing

Accessible web portal

- Access your account, 24/7
- Make online elections
- Communicate, report, and interface with employers and employees

Other benefits

- Automate compliance
- Track all benefits independently
- Reconcile NSF payments and overpayments automatically
- Submit CSV or Excel file formats
