RenewCard

All Trailblazers Leave a Path

Trailblazer *(noun)*: **one who makes, does, or discovers something new and makes it acceptable or popular; one who marks or prepares a trail for others to follow.**

Today's workers' compensation environment is complex and ever-changing due to an increasingly mobile workforce and a rise in injury severity and recovery duration. For over a decade, DataPath has been blazing a trail in the benefits administration industry with our card-based payment solutions. Our bank-neutral RenewCard can help you safely navigate the difficulties of workers' compensation and deliver timely payments, reduce fraud, and lower overall costs.

Rise above the challenges of indemnity payments with DataPath RenewCard.

powered by **DataPath**™

How does RenewCard work?

RenewCard simplifies the indemnity payment process. Once a payer submits a payment request, DataPath creates an ACH transaction, issues a pre-loaded RenewCard to the injured employee, and reloads the card with indemnity payments automatically.

How it Works

1. Payer submits a payment request then DataPath creates the ACH transaction

2. DataPath issues a pre-loaded RenewCard MasterCard® to injured worker

3. Subsequent indemnity payments are automatically placed onto the card

The easy-to-use RenewCard solves many of the common problems experienced by payers and injured workers, such as:

> **We receive a lot of phone calls from frustrated workers about missing or late payments.**

RenewCard is bank-neutral, helping drastically reduce the chance for fraud, payment error, and escheatment - all of which slow down the payment process. Once an injured worker receives the card and registers through the web portal, the funds are accessible. Additionally, payers set up a schedule that reloads the card on time and the funds are immediately available. Injured workers can feel at ease knowing that they can access their funds anywhere, anytime.

Of course, if the injured worker chooses not to use RenewCard, DataPath is flexible and can issue payment through traditional methods.

> **It's frustrating to deal with some vendors because they outsource their processes, meaning we have to deal with several different companies to resolve one issue.**

DataPath processes everything in-house. We draft from the bank, load the cards, and issue the cards. We also provide 24/7 support for any product issues. When an injured worker has a problem, DataPath works directly with the person to resolve it. That means zero-liability for you and greater customer service for the injured worker.
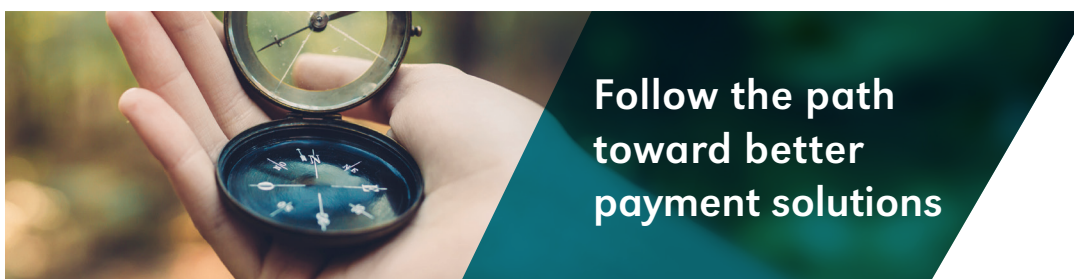

> **Check fraud is incredibly frustrating. It slows down the payment process and costs a lot of time and money to investigate the crime, stop payment, and reissue the payment.**

RenewCard is mailed directly to the injured worker, who has to register the card through a secure online portal. The worker is the only person who can log into the portal, minimizing the chance for fraud and escheatment. Once the card is registered, the injured worker can start using the funds immediately.

Features and Benefits

- **Electronic Data Interface (EDI) connects directly with claims system**
- **Customizable card and materials**
- **Card issues are handled by DataPath**
- **Zero liability policy**
- **24/7 support**

Take the pain out of workers' compensation claims with RenewCard.

Follow the path toward better payment solutions
